

M A R I N E

Friction Materials

Genuine - GBC

GBC woven brake lining, is produced in UK by Trimat Ltd, has excellent stability and high resistance to wear. The ultimate winch makers' choice , the "Rolls Royce" of brake linings.

Certified from **British Lloyds**
Delivered ex Greece - U.K.

OEM - MBL910

MBL910 quality is OEM to a few well known winch manufacturers, has very good performance to heat and compressing under loads. An excellent balance between value and performance.

Certified from **British Lloyds, DNV**
Delivered ex Greece - U.K. - China

Non OEM - WR251 / MBL810

WR251 is a woven brake lining with good frictional properties in wet, oil and dump environments, ideally suited for use in marine application, trusted from major European dredging companies. The credible budget choice for spot dry or dry docking requirements.

Certified from **SGI Compliance**
Delivered ex Greece - Netherlands

MBL810 quality is an asbestos free composite, from finely carded yards, containing brass wire. The cost effective- credible performance solution for your dry dockings in China.

Certified from **British Lloyds**
Delivered ex China

Auxiliaries

Brass countersunk bolts and nuts, washers, pins, produced according to DIN specifications.

Delivered ex Greece - Netherlands - U.K. - China

Bearings

Composite Bearings

Composite bearings for rudders, propeller shafts, deck equipment, bushing high loads, low RPM. Specially designed for use in marine environments. Manufactured in U.K. from synthetic fibers and thermosetting resins

- Self lubricating
- Low coefficient of friction
- Low wear rate
- High edge and shock load capabilities
- Lighter than steel by 1/6 of weight

Composite bearings are the **new technology** that replaces bronze, babbitt nylon bearings.

Certified from **British Lloyds - LR** list of Approved Synthetic Rudder Bearing Materials

Delivered worldwide

Roller - Ball - Needle Bearings

Roller -ball -needle bearings for electric motors – generators. All types of steel bearings, roller and ball bearings, needle bearings, thrust bearings, manufactured under strict supervision by SKF, NTN – SNR, IKO, FAG in factories all over the world.

Delivered worldwide

Custom Made Parts

Custom made disk brakes for special applications, like davits, life boats, cranes in suitable friction materials selected by Elvifren.

Metallic parts for winches and cranes like bushes, brake spindles, nuts, bolts, studs ect.

Delivered ex Greece
